

Jeyanthan GJ

AI-focused ECE student specializing in Computer Vision, Generative AI, RAG, and Knowledge Graphs. Experienced in IoT and embedded systems with strong interest in building real-world intelligent applications. Passionate about developing scalable AI solutions integrating hardware and software.

📁 PROJECTS

Hybrid Lightweight YOLO Model for Real-Time based Target Detection Feb,2026

using Computer vision, Knowledge distillation , Edge AI
Developed a lightweight AI model to detect small vehicles in drone images. Used GhostNet architecture and knowledge distillation to improve accuracy. Achieved real-time performance on Raspberry Pi edge devices.

Engineering Drawings Data Extraction Dec,2025

using GenAI, VLM & Computer Vision
Built an AI pipeline to automatically extract and analyze information from engineering drawings.Used YOLOv8 and Vision-Language Models for region detection and text extraction.Applied FLAN-T5 LLM to generate structured technical summaries.

Secure IT Company Network MAR,2025

Networking and Security
Designed and simulated a secure enterprise network using Cisco Packet Tracer with IDS and IPS to detect and prevent malicious activities.Tested real-time attack scenarios to validate intrusion response mechanisms.

Restuarant Menu Ordering System OCT, 2024

IoT and Web
Implemented table-side ordering with an LCD and keypad, transmitting orders to the kitchen via Zigbee. Designed a web interface for updating item quantities and processing bills via UART communication with Arduino.

College Management System Using OOPS DEC, 2023

using C++
Implemented features for student and faculty data management, including record creation, modification, and retrieval. Ensured efficient data storage and retrieval using structured file handling techniques.

Education Institution Management System SEP, 2024

Using HTML, CSS, PHP, MySQL
Designed a responsive web interface for user-friendly navigation and data handling. Implemented secure database operations for storing and retrieving institutional records.

Audio Mixer Circuit NOV, 2023

Electronic Circuits
Designed an Audio Mixer Circuit using resistors and transistors to mix multiple audio signals into a single output.

📺 WORKSHOPS

Fundamentals of Deep Learning MAY, 2024

NVIDIA
Powering IoT using Arduino
GYAN MITRA'24

FEB, 2024

🎓 EDUCATION

B.E. (Hons) in Electronics and Communication Engineering (Specialization in IoT, with additional vertical in Networking and Security)

Mepco Schlenk Engineering College

2022 – 2026 | Sivakasi, India

CGPA: 7.87 (till 7th sem)

HSC

SAV Balakrishna Matriculation Hr.Sec. School

2022 | Vadakkankulam, India

Percentage:91.17%

SSLC

S.M Matriculation Hr.Sec. School

2020 | Mylaudy, India

Percentage:98.4%

LEADERSHIP AND RESPONSIBILITY

Placement Representative

ECE-C (2022-2026) boys batch at Mepco Schlenk Engineering College, Sivakasi

2023 – 2026

Convener

Institution of Engineers Student's Chapter, Mepco Schlenk Engineering College, Sivakasi

2025 – 2026

Active Organizer, GYAN MITRA '25

A prestigious national-level techno symposium held at Mepco Schlenk Engineering College, Sivakasi

2025

Joint Secratary

Institution of Engineers Student's Chapter Mepco Schlenk Engineering College, Sivakasi

2024 – 2025

Active Volunteer, GYAN MITRA '24

A prestigious national-level techno symposium held at Mepco Schlenk Engineering College, Sivakasi

2024

Executive Member

Institution of Engineers Student's Chapter, Mepco Schlenk Engineering College, Sivakasi

2023 – 2024

AWARDS

Best Mini Project **NOV, 2024**
(Restaurant menu ordering system)
Awarded Best Mini Project for designing and implementing The Restaurant Menu Ordering System

2nd Prize in Coders Crusade **APR, 2024**
At MECHNOTRON 2K24, a prestigious National Level Technical Symposium held by the Mechanical Engineering Department at Coimbatore Institute of Technology.

Presented Paper on "Big Data" **APR, 2024**
At MECHNOTRON 2K24, a prestigious National Level Technical Symposium held by the Mechanical Engineering Department at Coimbatore Institute of Technology

Best Mini Project **DEC, 2023**
(Audio Mixer Circuit)
Awarded Best Mini Project for designing and implementing an innovative audio mixer circuit.

HackerRank Achievement
5★ in Problem Solving and C++, 4★ in Python
1092 Hackos
Recognized for consistent coding performance and problem-solving skills through structured challenges

AREAS OF INTEREST

Generative AI and Large Language Models (LLMs)

Computer Vision

Internet of Things

Retrieval-Augmented Generation (RAG)

Vision-Language Models

Edge AI and Real-time AI Deployment

Computer Communication Networks

INDUSTRIAL VISITS

Keltron, Thiruvananthapuram **JAN, 2025**

C-DAC, Thiruvananthapuram **JAN, 2025**

VeeVee Controls Pvt Ltd, Bangalore **MAR, 2024**

CERTIFICATES

IoT Fundamentals: Connecting Things – Cisco
Networking Academy **MAY, 2025**

Introduction to Industry 4.0 and Industrial
Internet of Things-NPTEL **NOV, 2024**

The Joy of Computing Using
Python-NPTEL **MAY, 2024**

Digital Logic Circuits –Great Learning **JUL, 2024**

OOPs in Python – Great Learning **JUL, 2024**

Arduino vs Raspberry Pi-Great Learning **JUL, 2024**

Introduction To Internet Of
Things-NPTEL **MAY, 2024**

Problem Solving Through C-NPTEL **NOV, 2023**

IEEE English for Technical Professionals **APR, 2023**

SKILLS

Generative AI: Large Language Models (LLMs),
Retrieval-Augmented Generation (RAG), Knowledge
Graphs, Prompt Engineering, Transformers,
Hugging Face, Vision-Language Models

Programming: Python, C, C++, Java Basics

IoT & Embedded Systems: Arduino, Zigbee, UART
Communication

Computer Vision: YOLOv8, Object Detection,
OpenCV, Image Processing

Edge AI: Raspberry Pi, Edge Deployment

Tools: Git, Linux, VS Code, Google Colab, Kaggle

Model Optimization for Edge: TFLite, ONNX,
NCNN, MNN

Frameworks: FastAPI, Gradio

SOFT SKILLS

Leadership & Team Management

Problem Solving

Time Management
